

THE TECKEL

This small, very high-performance unit is designed to clamp onto a mobile asset, fit onto your keyring, and slip into your bag or into a crate.

A powerful miniaturized device to track people, goods or vehicles

Weighing only 35 grams, the TECKEL is presently the smallest chargeable GSM / GPS tracking device in its class & will track any mobile asset!

Know exactly where your values or loved ones are. Know that help is a button away!

Ideal for:

- Containers, tanktainers, IBCs
- Palettes/crates of high value/strategic goods, moneybundles
- Construction and agricultural machinery
- Multi environment tracking, apartments, city centres, even when access to sky is limited
- Marathons, paragliding, cars, motorbikes, scooters
- Children, VIP's & personnel tracking
- Handbag and suitcase tracking

With its protective waterproof casing, attach it on a mobile asset or hide it in a crate →
